

VALIDATION TECHNOLOGIES INCORPORATED

Validation Technologies, Inc.[®]

An ISO-9001:2000 Certified Company

Successful Pharmaceutical, Medical Device and Biotechnology projects are built on one key element.

The key element of knowledge!!

It comes from the knowledge that Validation Technologies, Inc.[®] has successfully managed hundreds of worldwide pharmaceutical, medical device and biotechnology projects that includes design review, construction qualification, commissioning and start-up, validation, and regulatory support. As a result, we've become a valuable asset in helping to meet your expectations of quality, cost efficiency, schedule and safety. We also maintain a full service, international validation department that works as part of the integrated project team. The success of our projects is based on developing partnerships with our clients to ensure their project goals are achieved.

The backbone of our business has been our core competencies of **TECHNICAL, VALIDATION, REGULATORY and COMPLIANCE** services. Validation Technologies is a global leader in the following services;

- Validation Master Planning
- Computer Validation
- Commissioning and Start-up
- Process Validation
- Process Analytical Technology (PAT)
- Calibration and Metrology
- Utility, Equipment and Laboratory Instrumentation and Process Equipment Qualification (IQs, OQs, & PQs)
- Preparation for FDA Inspections and ISO Audits
- Quality Assurance and Regulatory Compliance
- Risk Assessment and GAP Analysis
- Facility Design Review
- Cleaning Validation
- Laboratory Start-up Support
- Project Management
- Temperature Mapping for Environmental Chambers
- Auditing and Preparing API Manufacturers to Meet EU and FDA Regulations

Over the years, Validation Technologies, Inc.[®] has worked on numerous biotechnology, pharmaceutical and medical device projects both national and international that have been inspected and approved by FDA, EU, HPFBI and other international Regulatory Agencies.
